SMK and Myant Announce Partnership on the Smart Textile^{*1} Business

SMK Corporation (President, CEO and COO: Yasumitsu Ikeda) announced a business partnership with a Canadian company, Myant Inc. (CEO: Tony Chahine), with the aim of co-developing innovative solutions for application in the emerging smart textile market.

SMK will develop advanced electronic components for Myant's SKIIN™ Textile Computing™^{*2} Platform.

SMK will continue to aggressively pursue business creation in growing markets such as healthcare, fitness, AR/VR, automotive, and aerospace.

<Current applications being developed on the platform include solutions for>

1. Heart health (electrocardiogram, heart rate, heart rate variability) monitoring
2. Exercise (steps, calories, activity, and posture) tracking
3. Sleep (sleep stage, hours slept), and stress (level, temperature) management
4. Temperature sensing
5. Electrical muscle stimulation (EMS) delivery and more

About Myant Inc.

Founded in 2010, Toronto-based Myant Inc. is creating the world's first Textile Computing™ Platform.

^{*1} Smart textile: Clothing made of fabric with conductive fibers that can measure biological data just by wearing them.

^{*2} SKIIN™ Textile Computing™: The technology developed by Myant Inc. that connects data measured through smart textile products to other systems in the environment.
